

FØRO®

The Føro light strings bring atmosphere, whenever and wherever they are being used. Choose from different types and sizes of bulbs and connect up to ten strings to one another to add one hundred meter of cosiness to your garden, terrace or event. All strings and bulbs are also separately available. Light strings with correctly installed light bulbs are completely water proof and can stay outside permanently without any doubt. Ready to shine bright?

DID YOU

... a led spot brings clear and warm light, has a long life span and saves a lot of energie.

... the colour temperature is expressed in Kelvin? The lower the value, the warmer the light and the cosier the atmosphere.
